

SPECIAL NOTICE

ASYCUDA system was updated from 117d to 118d1 on 4th September 2009. It facilitates to key-in more than 4 containers in the same CusDec. Users are expected to key-in the containers as follows.

1. Cage 9 should be “1” in the CusDec.
2. Do not key-in containers in cage 31 in the container field.
3. Press F9 or right click the mouse on the CusDec.
4. Go to Quadrants → Container Management → Key-in the Container and add the container details.
5. To add another container in to the list press F2.
6. After adding all the containers close the Container Management Sheet and proceed with the normal CusDec key-in process.
